Panginay, Guiguinto, Bulacan, Philippines | 09563467679 | aldredecorona06@gmail.com | <https://github.com/soraqx> | <https://www.linkedin.com/in/aldreneqx/>

Professional Summary

Resourceful Computer Engineering graduate with a strong foundation in full-stack development, embedded systems, and IoT solutions. Proven leadership experience directing regional engineering organizations and executing large-scale technical events. Entrepreneurial problem-solver with hands-on experience in both hardware design and software engineering, dedicated to building scalable, innovative technologies.

Technical Skills

- **Languages & Frameworks:** Python, TypeScript, C++, React, Convex, Java
- **Hardware & Embedded Systems:** Raspberry Pi 4B, ESP32, Microcontrollers, Relays, Sensor Modules, IoT Integration
- **Tools & Platforms:** GitHub Copilot, Vercel, Netlify, Fusion 360 (3D Design & Printing), Figma
- **Cybersecurity:** Capture The Flag (CTF) Methodologies, Vulnerability Assessment

Education

Dr. Yanga's Colleges Inc. (DYCI) *Bachelor of Science in Computer Engineering* (2022-2026)

Professional Experience

DvCode Technologies Inc. *Computer Engineering Intern* | Feb 2026 – May 2026

- Completed a rigorous 300-hour technical internship, contributing to active development and deployment cycles.
- Improved website efficiency by utilizing pagination and modularized functions within the codebase.

Key Projects & Hackathons

- **RemitSafe (Build What Moves Money Hackathon):** Developed the native application counterpart for a web-based blockchain system designed to create international payment pledges, successfully mitigating cross-border remittance delays.
- **AI-JEEP (Undergraduate Thesis):** Developed a transport safety monitoring system utilizing Raspberry Pi 4B, ESP32, and custom sensor integrations to track and report safety metrics.
- **Commodus:** Architected a robust software and embedded system leveraging Python, TypeScript, React, and Convex.
- **ChatCommIoT:** Engineered a standalone hardware project utilizing precise location toggles and integrated haptic feedback mechanisms.
- **Petamentor:** Modeled and assembled a PET pultrusion machine, extensively utilizing Fusion 360 to design and calibrate 3D-printed mechanical components.

Leadership & Extracurriculars

Institute of Computer Engineers of the Philippines (ICpEP) *Regional Board Director (Region 3) & Chapter President (ICpEP.se - DYCI)* | 2025 – 2026

- Lead Technical Organizer for the 9th CPE Challenge: "Level Up: Showcasing Skills, Strategy and Innovation in Computer Engineering" (March 24, 2026).
- Automated the distribution of e-certificates for 2 webinars of the regional organization.

Cybersecurity Competitor Team DYCI-404 Member | 2025 – 2026

- Actively competed in regional technical challenges, including the HackForGov 2025 Region 3 Competition, and the 2025 TrendMicro University Capture the Flag.
